

Their sexuality has not been repressed

They make love, not war

Image2 : a shaman connected to the energy of the universe.

Draw your own picture here

He communicates with the living world

They draw their power from the circulation of the libido energy

Let's act so that our children may develop all their potentialities !

Do you know that most of the individuals living in the industrialized society are neurotics?

There are two types of neurotics: those who know that they are such (and who are curing themselves or plan to do so) and the others...

Most of the neuroses originate in sexual repression and in the repression of the expression of emotions, sensitivity and feelings.

Question: how a people composed of neurotics can give birth to a healthy model of society?

Do you know that our general health , both psychic and physical, is primarily conditioned by the circulation of energy in our body?

This energy, the approach of which is familiar to the Far-Eastern philosophies and therapies as well as to the shamans, is the vital energy, common to all the living beings. It is the sexual energy (or libido.)

However one of the effects of sexual repression is to create obstacles preventing this energy from circulating. These obstructions can sometimes lead to cancer.

To acknowledge, accept and feel this continuity between the human being and the rest of the world that's being an ecologist.

Do you know which is the more determining common point between exploitation (submission) and fascism (the emotional plague)?

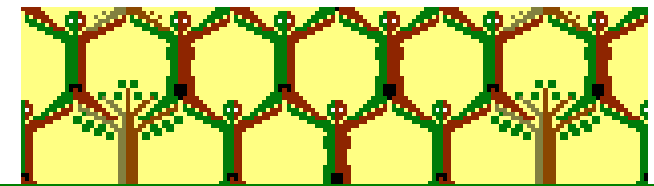

It is their common root: sexual repression !

This is why fascism is not an "accident in history", on the contrary it cannot be separated from the exploitation system.

To be efficient we have to address the issues from the root... This is what **political psychoanalysis** aims at.

*"People fall into such or such madness, complain about this or that, because their bodies are stiff, because they are unable to give love or to enjoy it."
Wilhelm Reich, in Listen, little man!*

International Movement for a

Libido Ecology

www.ecologielibidinale.org

Aim of the organization

To prevent the neuroses and the emotional plague in order to allow each individual to develop his emotional, intellectual and bodily capacities, in order to improve the social relations and to prevent totalitarianism. As well as promoting a view of man as integral part of nature.

Considering

that the **neuroses and the emotional plague**, most widely spread in the population, are the causes of depressions, difficulties of communication and irrational behaviors, creating conflicts particularly within the families and within the professional framework, and more generally in the life of the society and can therefore be considered as a social plague,

that the **damages to nature** result in particular from neurotic or 'plague-stricken' behaviors and from an anthropocentric view of the world, devaluing the biological body, living matter,

that **sexual repression**, the main cause of the neuroses, generally produces individuals poorly suited for autonomy and thus supports the submission, manipulation and exploitation of these individuals,

that sexual repression can also result in the emotional plague, which reveals itself in non respectful sexual behaviors, irrational behaviors, fascist behaviors, as well as mystical tendencies,

that the existing **education system** in the so-called 'industrialized' is above all centered on the assimilation of knowledge to the detriment of critical thinking, and, under the pretext of socialization, aims towards emotional, sensual and bodily inhibitions.

our association settles on the following objectives:

the **prevention** of neuroses and emotional plague, in particular by opposing any form of repression of the emotions, the feelings and their expression and opposing any form of sexual repression,

the reunification of body and mind and the restoration of the possibilities of development of **human potentialities** (both individual and collective) through the free circulation of libido energy,

the strengthening of an **ecologist perception** of the relationship between humankind and nature, while stressing the identity between the energy of live and the energy of sexuality (libido),

the building of an education model that aims at giving access to the pupil to the **free determination of his judgements and his acts**.

the inclusion of sexual achievement among the founding principles of any project aiming to **transform the society**,

in particular by the following means:

- **inform** the public on the energetic and psychic functioning of the individuals and on the social and environmental implications which result from this,
- **train** the teachers, parents and future parents in the education of children on the basis of psychology and psychoanalysis,
- give **sexual education** courses,
- conduct and support **scientific research** aimed at improving the knowledge of the relations between the individual and the collective, and aimed at developing means to prevent alienation,
- **decipher**, reveal and oppose any form of propaganda devaluing sexuality or some forms of sexuality, and more generally denaturing the body,
- promote body expression and creativity **in educational programs**, including an awakening to sensibility and sensuality. Incorporate in these an effective and sustained sexual education and a teaching of practical psychology fit for children,
- promote the **active participation** of the pupils to the definition of the teaching practices, of the schooling programs and of their aims,
- promote **holistic** and systemic methods in the practice of medicine and psychology,
- amend national and international **legislation** in order that any act of sexual repression becomes an offense.

"What's the point of a revolution without general, general copulation, copulation, copulation?"*

Peter Weiss, in Marat-Sade.

Let's act together while there is still time

Restore the health, the well-being of people and freedom in the society with the I.M.L.E.

Membership form

Please write below your coordinates IN CAPITAL LETTERS

Name.....

Address.....

.....

Zip code.....

Country.....

E-mail.....

Phone (optional).....

Individual annual adhesion at free price:

assess yourself how much you can give.

(Donations can only be deducted from the income tax if you pay this tax in France.)

Members will receive periodic news bulletin and will be convened to the annual general assembly.

Do you accept that we transmit your coordinates to members in your area in order to set up a local group?

Yes - No (surround the answer).

Do you accept to be contacted to carry a voluntary activity on behalf of the association?

Pedagogical activity - Making contact with the professionals and the institutions – Promoting the association (holding a stand, distributing leaflets...) – Anything else? (surround the items which interest you).

Send back this form together with your payment in cash to the following address or contact us (see email on the web site) for international bank order.
